

IANA Report to the IETF

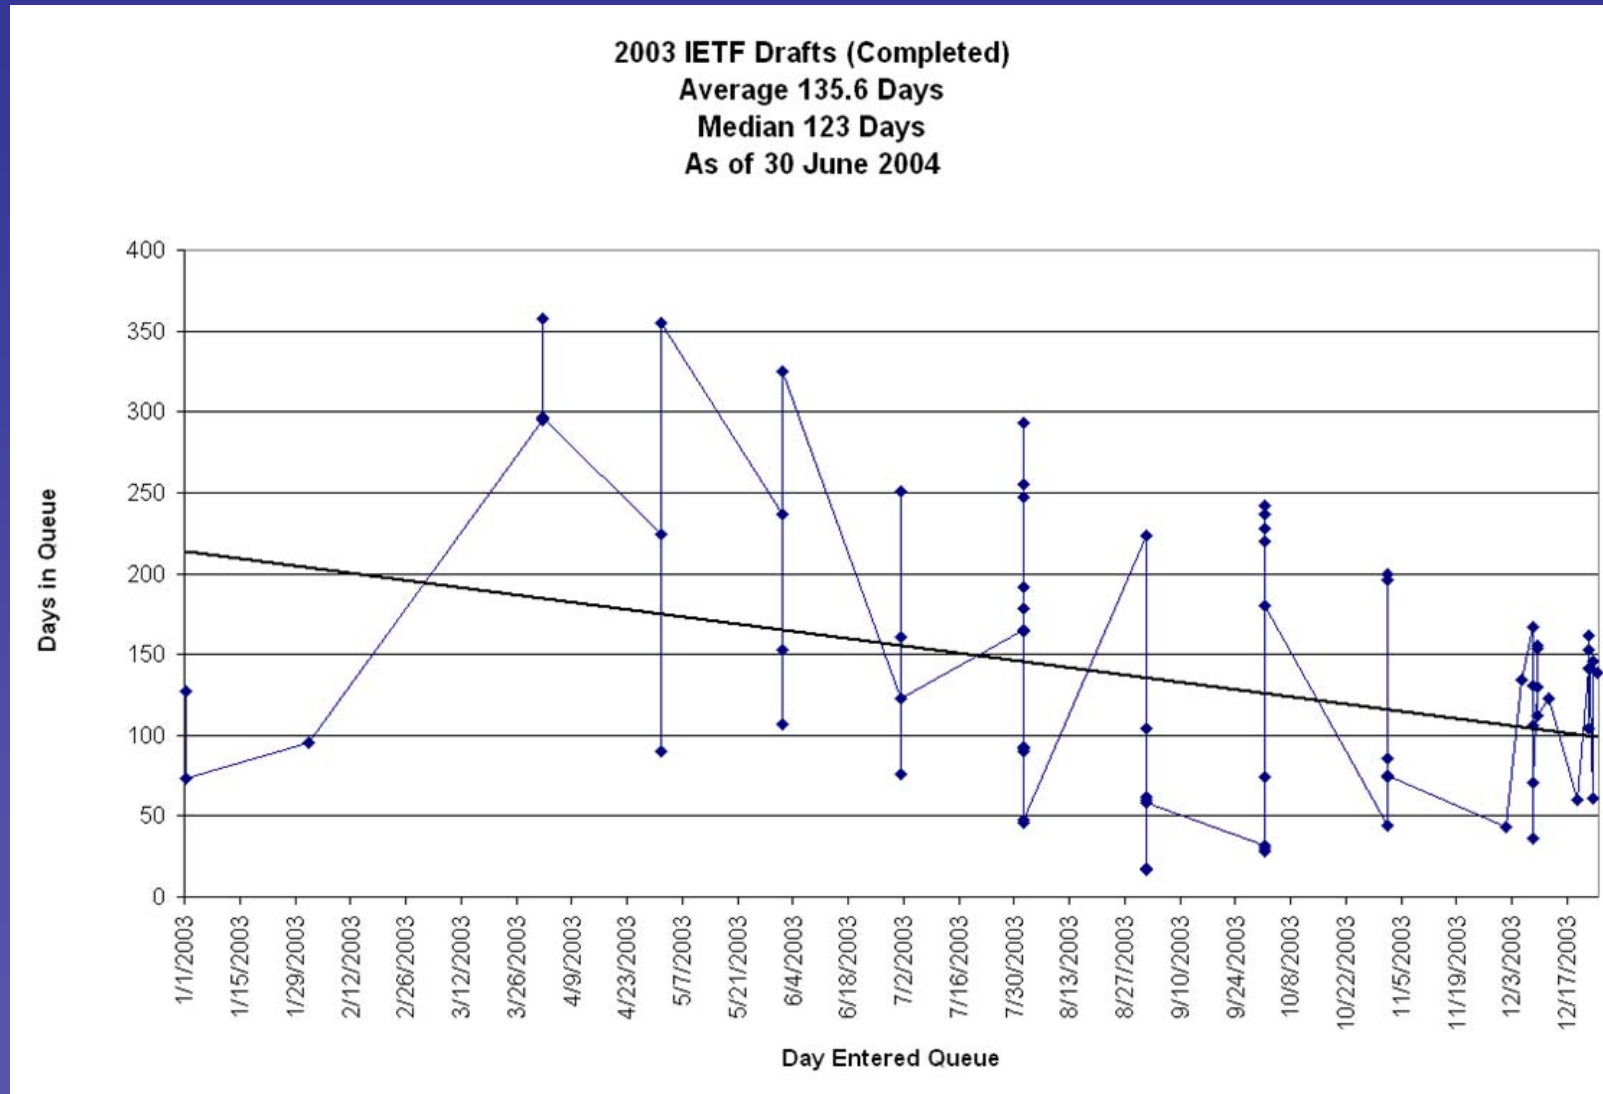

by Doug Barton, General Manager

barton@icann.org

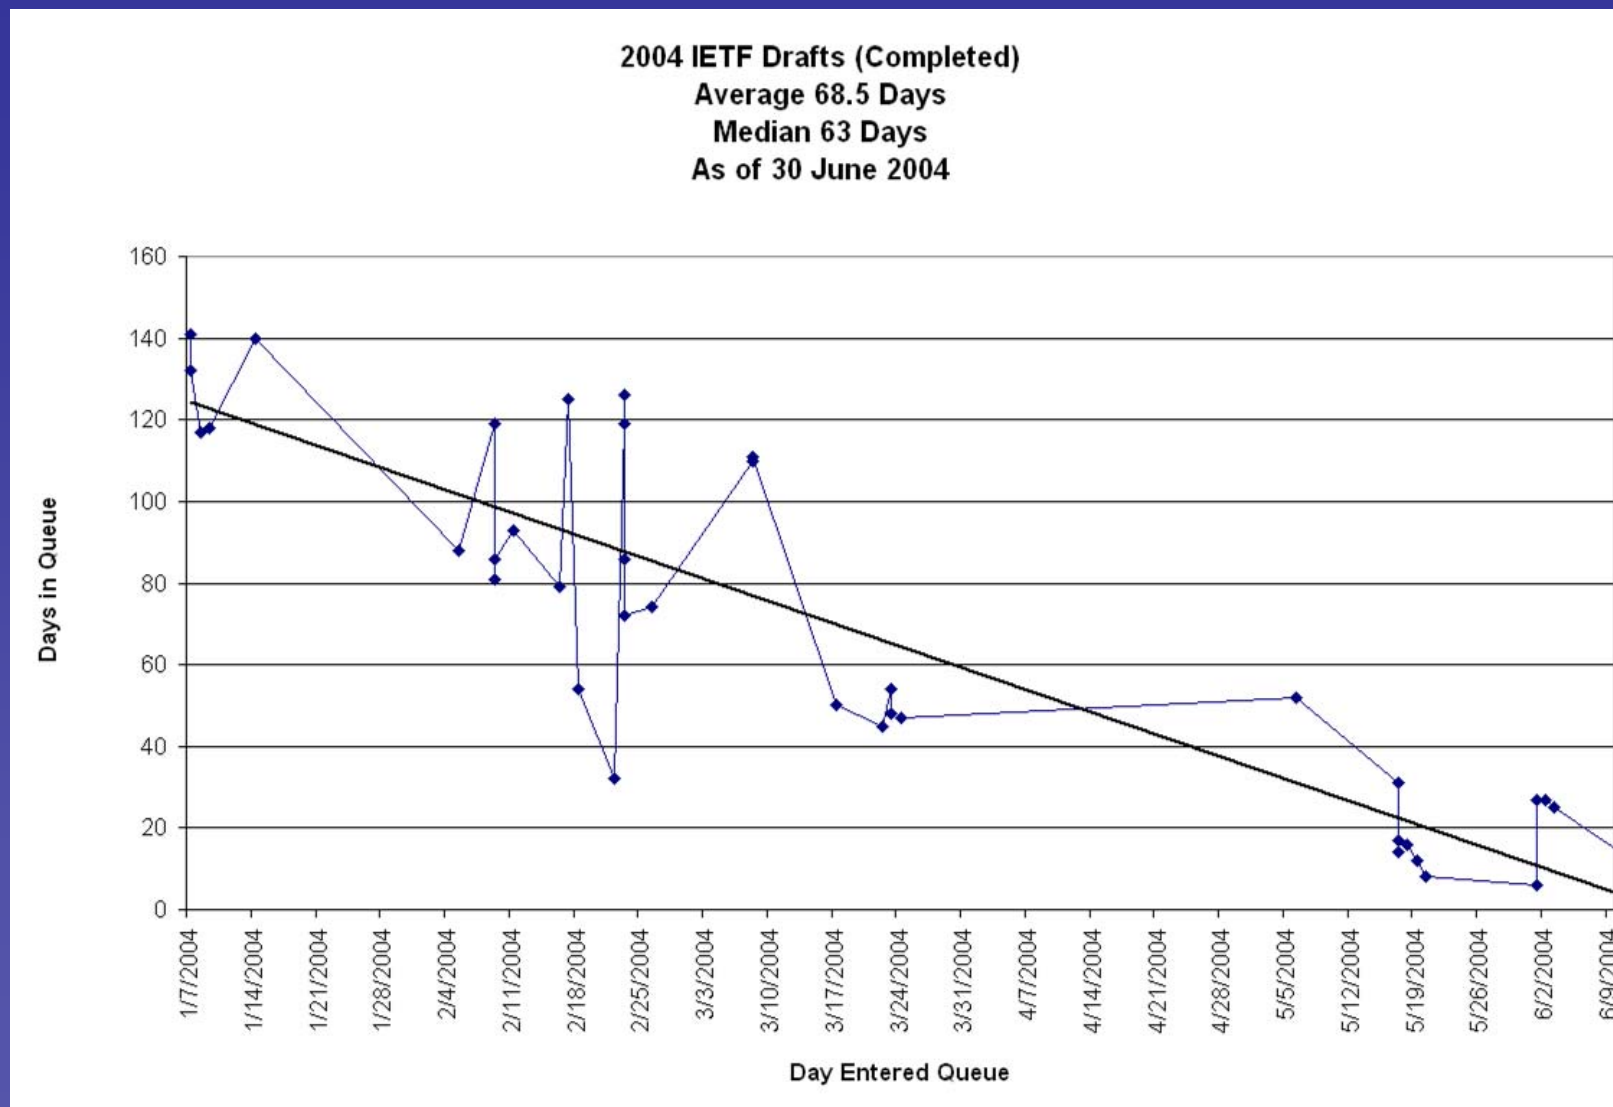

Outline

- Performance and statistics
- Plans for the future
- IPv6 Glue For The Root Zone

Performance and Statistics IETF Drafts

Performance and Statistics IETF Drafts

July Queue Statistics

- Total Drafts for Period: 45
 - Drafts in Queue at Start: 30
 - Drafts Received in Period: 15
- Total Drafts Completed: 10
 - Prior Drafts Completed: 10
 - Current Drafts Completed: 0
- Drafts in Queue at Close of Period: 35
 - 33% Reduction in Queue Size

Plans for the future

- Work with the RFC Editor, Allison Mankin, Bill Fenner, and Thomas Narten on documenting the status quo
- Work with all of the above to define what the process *should* look like
- Start working with all 3 teams on defining the mechanisms for the exchange points, flow, etc.

Help Wanted

<http://www.icann.org/general/jobs.htm/>

4 August 2004

IETF 60 Plenary

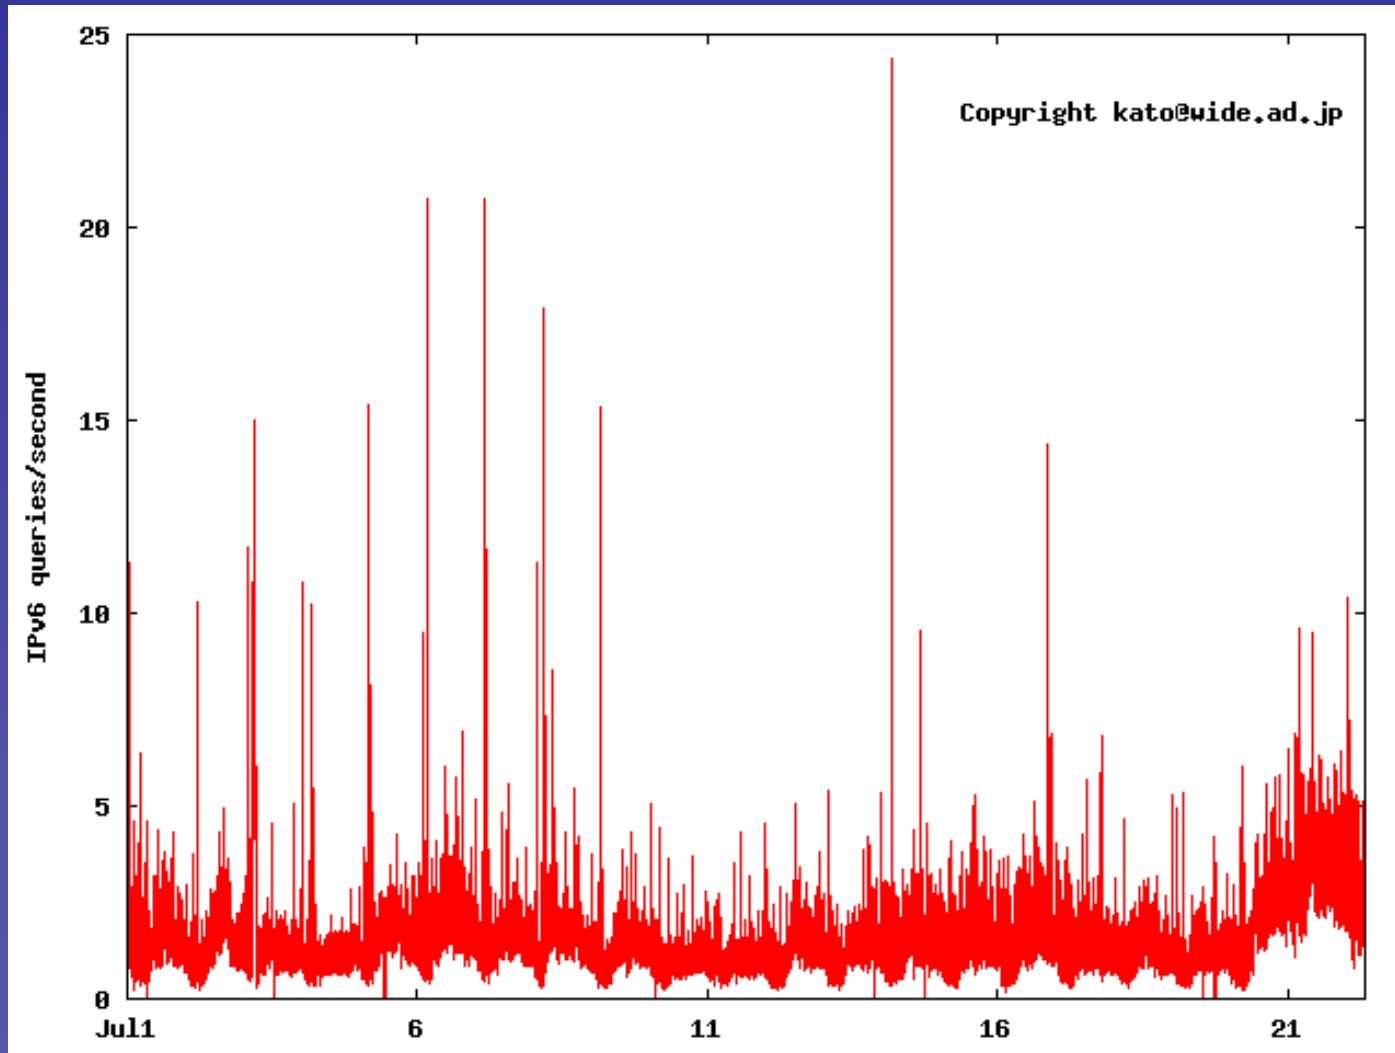

IPv6 Glue for TLDs!

- ccTLD managers submitted requests to IANA
- IANA staff referred the question to ICANN structures for advice
- RSSAC adopted the question, conducted an exhaustive study
- December 2003 – RSSAC recommendation to ICANN board
- July 2004 – Publication of Delegation Data Procedure

<http://www.iana.org/procedures/delegation-data.html>

IPv6 Requests for JP
